

ACCELERATE

Bean
Bush

Phaseolus vulgaris

Accelerate is a collaborative introduction between Pure Line Seeds and the University of Wisconsin. This large-sieve bean variety is specifically bred for its high yield and strong disease resistance. Known for its substantial root mass, Accelerate supports healthy production throughout the growing season. With a maturity period of 53-54 days, it is well-suited for both early and full-season crops. This variety thrives in cooler climates, making it an excellent option for areas with a shorter growing season.

Properties	
Variety name	Accelerate
Species	<i>Phaseolus vulgaris</i>
Common name	Bean
Family	Legume
Type	Annual
Days to maturity	54
Pod length (inches)	6.5
Pod color	Medium (M)
Percent 1-3 Sieve	10
Percent 4 Sieve	40
Percent 5 Sieve	50
