

RED BARN

Bean
Dry

Phaseolus vulgaris

Dark Red Kidney Beans are a high-yielding, versatile dry bean variety known for their large, kidney-shaped seeds and deep red color. With a strong plant structure and excellent seedling vigor, this variety offers reliable performance in various growing conditions. The beans have a firm texture, making them ideal for canning, processing, and culinary use. Additionally, they exhibit good disease resistance and adaptability, ensuring a productive and high-quality harvest.

Properties	
Variety name	Red Barn
Species	Phaseolus vulgaris
Common name	Kidney bean
Family	Legume
Type	Annual
Days to maturity	96 days
Plant length (Inches)	12-24
Pod color	Green
Percent 1-3 Sieve	
Percent 4 Sieve	
Percent 5 Sieve	

Disease Resistances

BCMV - R
White mold - T
CMM - IT
