

# GREAT NORTHERN

**Bean  
Dry**

*Phaseolus vulgaris*

The Great Northern (Marquis) is a high-quality, high-yielding variety known for its large, oval-shaped white seeds. With a robust plant structure and fast maturity (85–95 days), this variety is well-suited for both dry bean production and canning. It thrives in well-drained, fertile soils and adapts well to a variety of growing conditions. The Great Northern bean offers a mild flavor and smooth texture, making it a popular choice for soups, stews, and other culinary applications. Its excellent germination rate and resistance to common bean diseases ensure reliable harvests and superior product quality.

Properties	
Variety name	Great northern
Species	Phaseolus vulgaris
Common name	Kidney bean
Family	Legume
Type	Annual
Days to maturity	90 days
Plant length (Inches)	16-24
Pod color	
Percent 1-3 Sieve	
Percent 4 Sieve	
Percent 5 Sieve
