

ASZM 24001

**Sweet
Corn**

Zea mays convar

This corn produces vigorous and robust dark green plants with 16-18 rowed ears sufficiently protected by the husks. This variety has a good yield potential combined with improved recovery rate on an MDMV resistant plant.

Properties	
Variety name	ASZM 24001
Maturity (days)	80
Number of rows	16-18
Color	Yellow
Plant height (cm)	240
Ear height (cm)	110
Ear diameter (cm)	4,7- 4,8
Shape	Cylindrical
Husk protection	Medium coverage
Tip fill	Well filled
Resistances	MDMV (Maize Dwarf Mosaic Virus)

Disease Resistances

MDMV - HR
