

# ASZM 24003

**Sweet  
Corn**

*Zea mays convar*

This is an early sweetcorn with exceptional ear and good disease resistance. For an early variety an exceptionally high number of kernel rows with good tip fill and husk protection. This variety has intermediate MDMV resistance. It is well adapted to cool season conditions.

Properties	
Variety name	ASZM 24003
Maturity (days)	74
Number of rows	20-22
Color	Yellow
Plant height (cm)	180
Ear height (cm)	90
Ear diameter (cm)	5,2 - 5,3
Shape	Cylindrical
Husk protection	Medium coverage
